

Connecting QwikSwitch WiFi Bridge to router

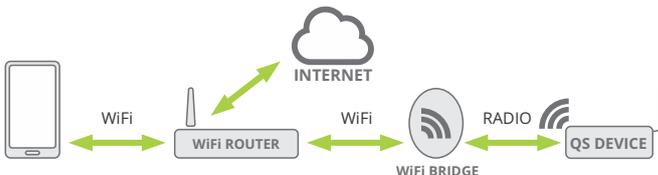

1. Enable WPS mode on your router (refer to your router manual).
2. Hold down the button on the QwikSwitch WiFi Bridge, release when LED flashes purple.
3. Allow up to 20 seconds for the QwikSwitch WiFi Bridge to pair with your router.
4. Blue LED will indicate successful pairing...done!

Registering your WiFi Bridge

1. Visit www.qwikswitch.co.za
2. Select "Login" and "New user".
3. Sign up with your personal details and the modem key (# xxxxxxxxx) found on the rear of the unit
4. Select "Sign up" and refer to the verification email sent to your selected email address.
5. Verify with the email, select username, password and login
6. Add the QwikSwitch devices to the online interface.

Note

On successful power up the WiFi Bridge will flash Red, Purple and settle on blue.

If you experience any problems, please contact the national QwikSwitch office: support@qwikswitch.co.za
